

PROFESSIONAL SUMMARY

Results-driven **Full-Stack Software Engineer & Systems Architect** with deep engineering expertise across **ASP.NET Core (.NET 10), C#, MERN Stack (MongoDB, Express, React, Node.js), Microsoft SQL Server, Graphic Designing (UI/UX / Figma), and Technical SEO**. Experienced in designing resilient enterprise architectures, high-throughput relational schemas, RESTful APIs, and modern interactive web applications. Dedicated to writing clean, maintainable code with strict zero-trust cyber security principles, atomic database transactions, and sub-second page performance.

TECHNICAL COMPETENCIES

Backend & Languages:	C# (.NET 10, ASP.NET Core MVC / Web API), Node.js, Express.js, PHP, LINQ, Entity Framework Core 10
Frontend & UI Engineering:	React 19, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS v4, Bootstrap 5, Vite, Framer Motion
Databases & Caching:	Microsoft SQL Server, MySQL, MongoDB, Redis In-Memory Caching, PostgreSQL
Design & UI/UX:	Graphic Designing, Figma, Adobe Creative Cloud, Design Systems, Wireframing & Interactive Prototyping
SEO & Web Performance:	Technical SEO, Core Web Vitals, PageSpeed Optimization, Semantic Schema Markup, Speed Tuning
Architecture & Tools:	MVC & Repository Pattern, RESTful Microservices, Git/GitHub, Docker, Postman, Visual Studio 2022

KEY ENGINEERING PROJECTS

NED Academy University Management System (UMS) ASP.NET Core MVC, C#, Entity Framework Core, SQL Server, Bootstrap, LINQ - Architected an enterprise-level university platform managing student enrollments, faculty allocations, course hierarchies, and real-time notice board announcements. - Designed normalized relational SQL Server schema with EF Core repository pattern, preventing transaction deadlocks and ensuring ACID compliance. - Built role-based authorization matrices separating administrative, faculty, and student access privileges with audit trails.	Published // Production
NED Academy Admissions & Public University Portal ASP.NET Core 10 MVC, C#, EF Core 10, SQL Server, Bootstrap 5, LINQ - Engineered an end-to-end digital admission workflow featuring multi-step applicant registration, document verification queues, and automated fee voucher generators. - Integrated dynamic departmental CMS engine enabling academic administrators to publish course curriculum updates and news with zero code redeployment. - Implemented asynchronous validation pipelines and secure file upload sandboxing to prevent malicious payload uploads.	Published // Production
Nexora Digital Agency & Client Solutions Platform React 19, Vite, Tailwind CSS v4, Framer Motion, JavaScript, Lucide Icons - Developed high-conversion modern digital agency platform featuring dynamic multi-currency pricing (PKR/USD) and interactive scope estimator. - Constructed sleek glassmorphic UI components and 60fps fluid scroll animations while achieving 98+ Google Lighthouse performance scores. - Leveraged React 19 concurrent features with zero external heavy bundle overhead, optimizing initial paint times to sub-second thresholds.	Published // Modern Web
CyberSentinel: Autonomous Threat Hunting & SIEM Telemetry .NET 10, C#, eBPF, Rust, gRPC, PostgreSQL, Docker, Zero-Trust Architecture - Designing kernel-level telemetry system to monitor cloud-native workloads, intercept suspicious syscalls, and mitigate AI prompt injection vectors. - Building a zero-copy RingBuffer pipeline using C# Native AOT and Rust eBPF probes for sub-millisecond anomaly detection.	Under Active Development

ASP.NET Core, C#, Python, Redis Streams, WebSockets, ONNX Runtime, Vector DB

- Developing decentralized orchestration framework for cooperative AI agent swarms to execute automated codebase refactoring and compliance verification.
- Engineered event-sourced distributed state machines and Redis Streams memory boundaries to eliminate reasoning hallucinations.

🎓 EDUCATION & TRAINING

Bachelor of Science in Business Computing (BSBC) Sohail University, Karachi	2025 - 2029 (In Progress)
Advanced Diploma in Software Engineering (ADSE) Aptech Learning, Karachi	2024 - 2027 (In Progress)
